DETAILED ACTION

Allowable Subject Matter

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a lens zone having a depth of focus comprising a refractive power profile configured such that the depth of focus is at least 1.1 Diopters for light of 550 nm and where the area of the lens zone is at least 3.14 mm^2 (independent claims 1, 7 and 16).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Simpson et al (US 6,923,539) and Simpson (US 2006/0116763) are both cited to show other lenses having some similar structure, but does not teach or suggest a refractive power profile resulting in a depth of focus of at least 1.1 D for light of 550 nm, where the area of the lens zone is at least 3.14 mm^2 .
